

VERIFICATION OF RECEPTION

ON: Sept. 12, 1984

Thank you for your letter detailing reception of our broadcast on the above date.

WMZQ operates at an assigned frequency of 1390 KHz with a power output of 5,000 watts, 24 hours a day. WMZQ broadcasts with a directional antenna system utilizing different patterns for both day and night operations. Our array employs four 200 foot towers in line on a bearing of 108 degrees located just north of Falls Church, Virginia at a mean ground elevation of 368 feet.

Good luck to you with your DX'ing, and remember that Washington's best country music is located on WMZQ, FM 98.7 and AM 1390.

Sincerely,

Jonathan M. Hardee

Dear Karmit,

Sorry I took so long to reply - we have been quite busy here getting ready for the installation of a new transmitter & stereo exciter & we will be programming country music in stereo by the first of the new year (power output will remain @ 5kW)

Jon
