1266 Riverview Drive
Walnutport, Pennsylvania 18088

Dear Mr. Geary,

It was a pleasure to receive your report of reception of our signal on December 15 and 19, 1989. WSTK, Starlight 1290 is a non-directional station, broadcasting with pre-sunrise authority of 500 watts, daytime authority of 5000 watts, and post-sunset authority of 41 watts. Our transmitter is located in Colonial Heights, Va., just north of Petersburg. We are fortunate to have a Harris SX-5 solid state transmitter. Our single tower has an HAAT of 450 feet. Our STL is a brand new Marti model STL-10, so no quality is lost between the studio and transmitter. The only processing we are using currently is an Optimod 8000A in conjunction with an Audimax 4450A limiter.

Thank you so much for listening and taking the time to write. I hope to hear from you again in the future. Happy New Year!

Sincerely,

Chuck Mayo
Operations Manager
