September 26, 1969

Mr. Kermit Geary  
R.D. 2, Box 298  
Walnutport, Pa.

Dear Mr. Geary;

I am in receipt of your letter and reception report of September 23, 1969. Thank you very much for both.

As your most complete and detailed log compares and even surpasses mine I am forced to send you a letter of confirmation, therefore consider this letter a 'Confirmation of Reception' of WCVR Randolph, Vermont 1320 Khz on September 22, 1969 between the hours of 0026 and 0115.

WCVR Randolph is a new station having only been on the air since December 1, 1968 with a power of 1000 watts daytime only. We are located approximately 3 miles to the east of Randolph, Vermont on a side hill. The transmitter is a Gates BC-1G feeding a usual vertical antenna 200 feet above ground. Later in the year I expect to run another series of test programs similiar to the last ones to see what the DX will be during the cold weather. These tests, I hope, will be noted in the several publications of the DX clubs well enough in advance to afford everyone a chance to pick WCVR Randolph up.

Again I want to thank you for your interest in WCVR Randolph and if we can be of any further assistance to you please feel free to call upon us.

I remain

Sincerely,

David H. Chestnut jr.  
Engineer WCVR
