

Radio Station
WWWT-AM

P.O. Box 249
Randolph Center, Vermont 05061

3/18/91

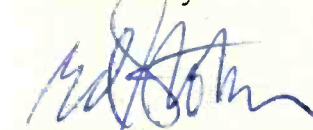

Dear DXer,

Thank you for your listening report which we confirm.

WWWT-AM is owned and operated by Stokes Communications Corporation, a family owned business. We also own and operate WCVR-FM, a 3KW FM station on 102.3 Mhz. WWWT-AM transmits on 1320 kHz. twenty-four hours daily. Our daytime power of 1KW is reduced to various levels during the post-sunset, nighttime, and pre-sunrise operating periods. Our transmitter is a 1968 vintage Gates BC1G using 833 amplifier tubes. The antenna is a 200' guyed vertical Rohn tower located in a swampy area behind the station. Our programming comes from the Satellite Music Network's StarStation service.

We always appreciate hearing from DXer's. So far, our most distant report is the one that came from Germany several years ago. Within North America, the most distant report is one that came from Colorado many years ago. By the way, I was an avid AM DXer back in the late '50s when my best catch was WBZ, which I received several nights in December 1958 on my souped-up AC/DC receiver in Watsonville, California.

Yours truly,

Ed Stokes
President & General Manager

Confirming your report
of reception 11/24/90

Thanks
