

Apr 8, 1948

Dear Mr. Beary:

We have your letter of March 31, and are sorry to hear you are picking us up in that part of the country. Our minimum radiation is to the East in order to protect WSB in Atlanta Ga., a 50KW station on 750 KC.

We would be interested in knowing if we are causing any heterodyne, or other interference to your reception of WSB before we shut down at local sunset, which this month is

7:00 PM P.S.T.

We come on the air again at 10:05 PM, P.S.T. which is the time W.S.B. closed down for the night and operate until 2 AM, P.S.T.

Thanks again for your letter and report.

Very truly yours.

N.W. Schoofeld Jr.
Transmitter Engineer
KXL Broadcasters
