Walnutport, Pennsylvania

Dear Kermit:

Many thanks for the very fine detailed report of your reception of our equipment test program of October 26 1950. I am personally indebted to each and every one of you fellows that has sent me a report. Without them you know, the broadcaster would be in doubt of certain things regarding the antenna system, frequency and propagation of the signal at nighttime. Should you hear W B K V on again please drop me a card with your results of reception. Again many personal thanks for your report.
