Walnutport, Penn.

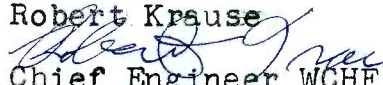

Dear Kermit,

Very pleased to receive your letter concerning Test transmission on the night of April 4, 1957. Didn't realize that we were putting out such a powerful signal. When I read that we were kicking up 7 micros it really astounded me.

The carrier interruptions you might have heard was the reduction of power to a 1000 watts by our power change ~~switch~~ switch.

Thanks once again for your fine report and if there is anything more I can do for you please write.

Sincerely

Robert Krause

Chief Engineer WCHF

P.S.

Your Program Schedule Was: practilly an exact copy of ours.
