Walnutport,  
Pennsylvania.

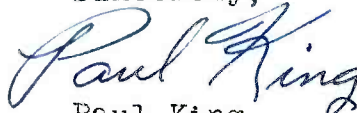

Dear Sir;

We deeply regret that this communication is late in being written, but can offer by way of excuse that the job has been that of the Chief Engineer to date and that individual has been kept quite busy with the various duties that are required during the first months of operation of a station. This duty has been therefore referred to me.

I, myself, at one time, was a DX listener and am glad of this opportunity. Your equipment there makes that I had look mighty sick....

Your report of reception coincides with the records here and is well worthy of our verification. Thanking you for your report and hoping this will serve as confirmation, I remain....

Sincerely,

Paul King  
Anncr.-Engr.
