Dear Kermit,

Am very sorry that I am getting this off so late but I have been and still am up to my neck in work with this station. Would like to thank you and verify your report of Oct 25, 51.

I got program tests started Oct 28, and we now have our license. My work also consists of Combs. Ann. so am kept busy.

We are using Dats Equipment throughout with antenna being a 179' self-supporting, slant fed. We are a daytime station. Xmitter BC-1 F with power reaction to 500 watts.

Would like to thank you again for report.

Very Truly Yours,

Edmer A. Johnson C. E.

Dear Kermit,

I am just about as slow at answering your second reception report as I was the first, but here it is better late than never.

The reason I was on the air that night was because I had just changed the Finals and Modulators, and made some adjustments to to raise my eff. alittle.

We have had very good luck with our equeptment since going on the air last October. I believe we have been off the air only about two minutes , and that was due to power failure. As I believe I told you before , we have a Gates BC 1F 1000 Watt transmitter, and Gates Concole, Freq Mon, Mod. Mon, etc.

Would like to thank you again for your reception report, it confirms with my log. Enjoy hearing from you and am sorry I didn't get your latter answered sooner.

Yours very truly,

*Elmer Johnson*
