Buckhannon, West Virginia

April 20, 1961

Mr. Kermit Geary  
R. D. 2 Box 298  
Walnutport, Pa.

Dear Kermit:

Your report of the reception of WBUC on April 15, 1961 was logged correctly. We thank you for your report of the reception.

A word about WBUC. We have been on the air 16 months. We hope to have a power increase to 5 kw soon. The present transmitter is a Gates 1 kw using 833-A tubes for modulators and RF amplifiers. The tower is 200 feet high, placed on low lying ground, 380 feet from the transmitter. The tower is fed with buried co-ax.

The announcement you heard was a tape recording of our sign off announcement, and I was doing the announcing.

Studios and transmitter site are the same.

WBUC regularly programs using three turntables, three tape decks, and three microphones, as well as the other auxiliary inputs, remote lines, beep phone etc. A Gates "Yard" console with 8 inputs is used.

Once again, thanks for the report.

Sincerely

*Jesse D. Newman*
