Kermit Geary  
R.D. 4, Box 321  
Walnutport, PA 18088

Dear Kermit,

I would like to thank you very much for the report of reception of WVMR's signal. It was a pleasure to learn that our signal could reach that far out.

I'll tell you a little bit about us. We are a community owned-and-operated public radio station. We began operation at 1 KW in mid-July of 1981. I am including a copy of our March 1982 programming guide to give you an idea of the types of programs we present.

We have a ROHN 180' AM broadcast tower with a 180' radial ground system.

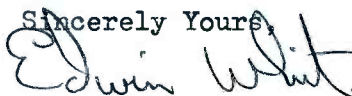

We use a MC MARTIN BA 2.5K transmitter operated at 2.5 Kilowatts.

The MC MARTIN is a single tube type. The 4-1000A is used, one pair operating in parallel in the Class C RF power amplifier stage, and another pair serving as class AB-1 modulators.

The BA 2.5K uses plate-screen high level modulation.

Again, thank you very much for your report, which I am happy to confirm. I look forward to seeing you whenever you are in the area.

Sincerely Yours,

Edwin White  
Acting Chief Operator  
WVMR - Frost  
Dunmore, WV 24934
