Walnutport, Pa. 18088

Dear Mr. Geary:

I was pleased to here from you concerning the reception of our station in that part of Pennsylvania. We use a one Kilo-Watt Gates F.M. transmitter running at 786 watts. This is fed to four Jampro antennas, giving us a power gain of 4.1 and an effective radiated power of 2820 watts. The antennas are mounted on a 250 foot self supporting tower so that the center of radiation is 212 feet above the average terrain.

I compared your partial log to our log to confirm your reception of our station. Since they were identical, I am writing this letter to confirm your reception.

Sincerely yours,

*Keith Mitchell*
