

THE CAROLINE BROADCASTING CO.

June 3, 1982

Mr. Kermit Geary
Rt. 4, Box 321
Walnutport, PA 18088

Dear Mr. Geary:

I read with enthusiasm your detailed DX report on WCTD. All your program listing is absolutely correct. While we have had some excellent reports on the stations coverage, yours is the most detailed, and there is no doubt you were getting a good signal.

Our tower is 320 feet high and we have a two bay Phelps Dodge antenna. The transmitter power is at 3300 watts.

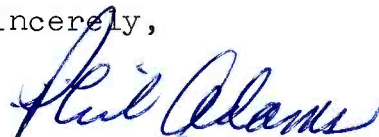

Your excellent reception is probably due to your being at the right height and probably right in line with our antenna.

We are enjoying great coverage with our station since the terrain around Federalsburg is just plain flat. There are no hills.

We have received reports of being heard regularly in Baltimore, but there again its probably in line with the stations antenna.

Again many thanks for taking the time to write, and if you are ever in the Federalsburg area, please stop in, we'd be glad to see you.

Sincerely,

Phil Adams,
General Manager
