Mr. Kermit Geary  
RD 4, Box 321  
Walnutport, PA 18088

Dear Mr. Geary:

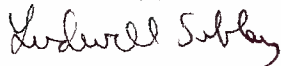

I'm happy to confirm your reception report on WCVH for 3-27-81.

WCVH operates from studios at Hunterdon Central High School just outside Flemington. The transmitter, a Wilkinson solid-state unit, is located at the county fire-police communications site near Cherryville. That location, plus tower height, give us a height above average terrain of 460 feet. The antenna is a two-bay type giving 39 watts ERP horizontal and vertical.

By the way, I do a little informal DXing myself, with a reconditioned Hammarlund SP-600 shortwave receiver and a quarter-wave ground-plane antenna cut for the 31-meter band.

In any event, WCVH is always pleased to hear of reception beyond our "normal" coverage area. Thanks for your report, and keep on monitoring!

Sincerely,

Ludwell Sibley  
Chief Engineer
