A LISTENER SPONSORED STATION

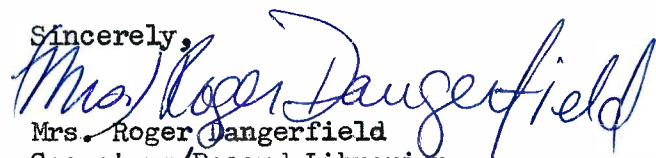

October 3, 1968

Dear Mr. Geary:

We have compared the data you sent regarding reception of our station and have found it to be in accordance with the programming which was broadcast. We are gratified to learn that we are well received in your area of Pennsylvania. Please consider this letter an official confirmation of your reception of WFMU. The output of our transformer is 1500 watts at this time. We have hopes of increasing our power in the future. Our antenna stands 90 feet off the ground, however, as to how many feet above sea level it is, we do not have an accurate measurement.

I have included for your listening pleasure a program guide. Ours is not the typical guide, as you can see, just as our programming is not that of a typical station. We hope that you enjoy our programming and that you will spread the good word (WFMU, that is) to your friends and acquaintances.

Sincerely,

Mrs. Roger Dangerfield  
Secretary/Record Librarian
