RUST COMMUNICATIONS GROUP, INC. • 700 FENWICK STREET, ALLENTOWN, PA. 18103 • TEL. 215 434-4424

January 7, 1978

Mr. Kermit Geary
R.D. #2 Box 298
Walnutport, PA 18088

Dear Mr. Geary,

Thank you for your reception report on WKKW. I'm sure you are aware that your letter does not constitute a DX Report since you receive us well within our primary service area. However, your log accurately reflects our programming from 11:57 A.M. to 12:36 P.M. on January 1, 1978.

I was interested to note your mention of the fact that WKKW was an AM station on 590 kilohertz in the late 1940's. If my information is correct, those call letters were at one time assigned to a station in the Albany-Troy, New York area. I believe that station's call letters are now WROW. I would be interested in hearing from you if you have any different or additional information on the matter.

Technically, WKKW is a Class B FM station operating in Channel 281 at a frequency on 104.1 megahertz with an Effective Radiated Power of 50,000 watts.

We wish you a belated Happy New Year and continued success in the area of DX Reporting. May I add, letters and reports such as yours are always encouraging and greatly appreciated.

With best regards,

Barry G. Wittchen
Chief Engineer, WAEB/WKKW(FM)
