

Woodbridge, Virginia

September 30, 1960

Mr. Kermit Geary
R.D. # 2, Box 298
Walnutport, Pa.

Dear Mr. Geary:

Thank you very kindly for your nice letter. This will verify the fact that you were listening to WBVA located at Woodbridge, Virginia.

Here is some information which may be of interest to you in regard to WBVA.

The effective radiated power is 10,000 watts. This is achieved thru the use of a G.E. BT-3B 3 KW Transmitter feeding H 1 Heliac transmission line thru a 4-Bay Andrews Multi-V Antenna having a power gain of 3.8 db. The Antenna is side mounted on a 300' tower at a ground elevation of 250'. We are currently filing with the FCC for an increase in power to 100,000 watts. We may raise the tower height another 100'.

We always enjoy hearing from our listeners and to know the type of receiver.

Please excuse the delay in making this verification but we have been going thru the vacation period.

Very truly yours,

Lenna M. White
Program Director WBVA
