

*weta fm / 5217 nineteenth road north / arlington, virginia 22207

Dear Mr. Geary,

May 22, 1970

Mr. Klimes, the chief engineer for WETA-FM has asked me to answer your questions. Yes, it was this station you heard on May 16, 1970. The log you made is correct. Our transmitter's power is 75 kilowatts-horizontal, which is the highest of FM radio stations in the Washington metropolitan area. The antenna is 475 feet above ground, 845 feet above mean sea level and 614 feet above the average terrain.

Thank you for your postcard, as we are always interested in hearing from listeners. We are on the air from 6 AM until 1AM the following morning. Do drop us a note should you have the occasion to hear us again.

Joyce Wilsie
