

November 26, 1943.

Kermit Geary
R.F.D. #2,
Walnutport, Penn.
Dear Sir,

Thank you for your letter of the 20th advising us of your reception of WQFL in Pennsylvania. We are always glad to receive any reports on the reception of WQFL and it is gratifying to know the signal strength is as strong as you report.

We have two transmitters, one of which is a reserve, both use power of 50 watts. We have a semi vertical antenna, 206 feet high. The transmitters are located on the top floor while the control room is on a lower floor, the #1 transmitter has been in continuous operation for seven years.

Sincerely,

Vern Watson
