RFD #2  
Walnutport, Pa.

Dear OM:

Thank You for the very favorable report on the sigs from Police Radio Station WPFY. Our frequency is 2442 kc. and we run 1250 Watts input to WE 251-A tube which is a Class "B" stage.

The transmitter is a WE 9 C and the line up is as follows; The crystal stage is a 205-F into a 205-F RF amplifier driving a WE 261-a tube which is modulated by Three WE 276-A's in class "A" the modulator WE 261-A drives the final WE 251-A. The speech is a WE 274-A amplifier starting with a double button microphone (carbon) into a 262-A amp. to a 262-A driving a pair of We 274-A's about 10 watts output driving the three WE 276-A modulators.

Your report of the various messages are correct and I hope that this station continues to give the DX fans some listening pleasure. I certainly hope the you get your Ham ticket and I might add you should make a very early attempt at the Exams. I am W2KTZ and have Been in the Radio game for 25 years. I've had and enjoyed much excellent QSO's.

Before I close I should mention that WPFY was the first sta. to use a "A" cut crystal. We also have talk-back Frequency modulation on 37,220 kc.

Good luck, health and best of

Well it looks bad for me running out of paper so I'll have to finish this letter on a second page or is this the second page. I might add that this station was installed in 1934 and officially put on the air October 13, 1934. We have 21 square miles of hills and valley. Four Police Precincts and 21 cars police this city.

So be it as we say on the Ham bands and the very best to You.

*Peter F. Dankovic*  
 Supt. of Radio  
 Chief Opr. # 90 WPFY  
 Chief Opr. W2XLA FM  
 Amateur W2KTZ  
 Radio Aide-Yonkers War Council.  
 Chief Opr. WJQN WERS.

PS. I'm all out of titles so until I get some new ones
