

ARMY SERVICE FORCES  
SIGNAL CORPS AIRCRAFT SIGNAL AGENCY  
AIRCRAFT RADIO LABORATORY  
WRIGHT FIELD, DAYTON, OHIO

June 9, 1944

Mr. Kermit Seary  
RFD # 2  
Walnutport, Pa.

Dear Sir:

Your letter of April 26 commenting on the reception of Police Radio WSAG was referred to me by the Chief of Police on my vacation in Ashland. I am the regular engineer of WSAG but am on a leave of absence now for some special work for the Army. The modulation trouble was still evident when I arrived but was cleared up by repairing the speech amp. I think the modulation will sound O.K. now if you pick us up again. Our frequency is 2430 which I think you will find to be correct. We appreciate your comments and we are glad to know that our signal comes in so well at your location.

The Chief gave me your letter to thank you and to say any comments in the future would be appreciated by him. Thanking you again I am

Very truly yours  
Vernon Reese
