

# RADIO WPDG GRAM

March 2, 1944

Mr Kermit Geary  
R.F.D. #2  
Walnutport, Penna.

Dear Sir:

In reply to your letter of February 24, 1944, We wish to acknowledge and thank you for the fine report that you gave us on our station WPDG. It was indeed gratifying to hear that we were giving WPDQ Akron and WPDV Charlotte a run for their money.

The xmitter here is a composite job using a pair of 250th's in the final with a normal input of 850 Watts, But we are runing 200 watts input now due to a breakdown in our final amplifier.

The antenna is a 95 feet Truscon Tower grounded at the base Shunt feed.

over

We have some 30 mobile units equipped with two-way radio and do all the dispatching for all the towns and townships in Mahoning County.

We also operate a Zone xmitter on 2808 KC (CW) for inter city work.

I must say that the log you sent was correct to the word and We wish to thank you again for your trouble.

I hope that this answers some of your questions and wish you luck and success as a amatuer radio operator, 73,s
