Mr. Kermit Geary
RFD #2
Walnutport, Penn.

Dear Sir,

Checking our logs, we find your reports of our Police station KQKM are O.K. and check with ours.

You asked the power of our station. It is a 250 Watt composite rig built by an engineer at Longview, Texas. We use (2) 4K254's in first - and 2032's in modulation, with a 100 ft tower (windcharger) on top of the City Hall.

You may recognize this red ink and writing. I just sent you a confirmation on the reports of KQKT in Paris. I have the pleasure of working with the boys here on maintenance and repair of this station KQKM. The op. on the mike the times you heard this station was ~~by~~ Sgt. Scott Means. I'm sure he would like to hear from you again too.

I hope to meet you on the amateur bands when the war is over too, as I plan to hit the air as soon as possible or when the F.C.C. turns us loose. Oh, happy day! eh?

Thanks very much for the report on the station and may we hear from you again.

Yours very truly
Mitchell O. Secrest
