Dear friend:

I wish to thank you very much for your letter dated January 20th in which you give me an exact report of my QSO's with HH2B and W2GB.

It is really astonishing that you should have taken word by word the entire QSO and I really admire it.

I will be very glad indeed the day that you have your own transmitter and I can talk with you. If it so happens in the near future do not forget to remember me that you were the man that sent me the best report I have received of my little station.

I take pleasure in sending you herewith my qsl card.

Hoping to hear from you soon again, I am

Very truly yours,

B. Méndez V.
