Kermit Geary
R.D. 2, Box 298
Walnutport, Pa.

Dear Kermit,

We recieved your very welcome letter toady and were quite surprised to say the least.

The signal you heard, however, was not a harmonic. Our studios are located about 2 miles from our transmitter sight and we pipe our signal to the tower by FM link rather than land lines. The frequency you gave is one of the link freqs. However, the link is only operating at 50 watts output, so you still did quite well.

Your description of the program material was very acurate with the exception of our 10:44 advertisement of the American Missionary Gift Shop. The actual copy is for the Aponte Gift Shop, followed by an Advertising Council public service message from the "Religion in American Life" campaing. However, we will over-look this minor error and possibly change our copy or schedule because somebody else might have gotten the same impression.

You are the second stateside listener we have heard from. We recieved a card during our night-time equipment tests on December 27th. from Eric Polkes in New York. He heard us on the regular 630 frequency by some conditional fluke, but it was still very interesting.

Once again, it was nice to hear from you and if you do hear us again, drop a QSL. Good Luck to you.

Sincerely,

Dean Brian, Production Mgr.
