Re:- Single Sideband Transmissions

Dear Sir,

We have received with great pleasure your letter including reports concerning your receiving of single sideband transmissions from Sweden and wish to inform you as follows.

The transmissions on the 7th October, 1957, received by you concern our radiotelephone service between Stockholm and Buenos Aires. The frequency used at this time was 26950 kc/s with the call sign SDV-13. The speech was a test transmission record. The transmitter is situated on the West Coast of Sweden and uses a rhombic antenna with the power of 5 kW.

Yours faithfully,

THE BOARD OF TELECOMMUNICATIONS
