REPLYING TO

MR. KERMIT GEARY,  
RFD. #2,  
Walnutport, Penna.

Dear Sir:

This is in reply to your recent inquiry concerning Bell Laboratories' radio station W2XAA.

This station is used in connection with various radio transmission tests that are not concerned with the performance of the transmitter. In fact, the signals would probably have little significance to anyone except the engineers at the laboratories' receiving stations.

We are, however, glad to confirm your reception.

Very truly yours,

  
C. J. GLINANE.
