Bern, NEUENGASSE 50
Nov. 7th 1945.

GEGENSTAND:

Dear Sir,

With pleasure we checked with our station log your report of October 17th 1945 on the reception you had on October 16th 45 from 20.30 to 21.07 EST on 40,65 meters i.e. 7.380 megacycles and on

The items you listed were found quite correct.

Indeed, you have been listening to our broadcast for North America.

We are glad that the reception could be qualified as R 8 QSA 5.

Let us hope these experiences will induce you in going on with listening to the Swiss voice and reporting from time to time. We thank you in advance for writing.

Please, find here enclosed the schedule of our short waves broadcasts.

Very truly yours,

P.S. Many thanks for this very fine report of yours.

Jan. 17th 1946.

GEGENSTAND:

Dear Sir,

With pleasure we checked with our station log your report of November 13th 1945 on the reception you had on November 12th 1945 from 19.18 to 19.54 GMT on 18,90 meters i.e. 15.875 megacycles and on

The items you listed were found quite correct.

Indeed, you have been listening to our broadcast for North America (first information service)

We are glad that the reception could be qualified as
R 7 QSA 5.

Let us hope these experiences will induce you in going on with listening to the Swiss voice and reporting from time to time. We thank you in advance for writing.

Please, find here enclosed the schedule of our shortwave broadcasts.

Very truly yours,

P.S. Mind the wavelength: 18,90 m. and not 16,90 m. The megacycles were correctly given. Actually, this first emission is broadcast on 28,83 m. = 10.405 megacycles.

Thanks for your kind wishes. A happy New Year to you!

UNSER ZEICHEN

81 - 105

Bern, NEUENGASSE 30
Jan. 28th 1946.

GEGENSTAND:

Dear Sir,

We have been greatly interested in your report dated January 2nd on the good reception you enjoyed on New Year's day i.e. Tuesday January 1st 1946 from 16.53 to 17.30 CET of the Swiss broadcast for the Orient, on 16,26 m. 18.450 megacycles. The signals were good considering the fact that the broadcast was beamed to the opposite direction and received with fairly good strength: R 6 and clarity: QSA 4. We have been glad to hear that you liked the Swiss popular music and that tonal quality as well as modulation of both speech and music were very good, the carrier-wave remaining sharp, clear and fully modulated.

We checked the items you noted with our station log and found them quite correct. Indeed you have been listening to the Swiss broadcast for the Orient on 16,26 m. i.e. 18.450 megacycles. Yes, this wave is the old HBF of Prangins near Geneva.

Many thanks for your kind wishes for our welfare in overseas service. We wish to you to go on enjoying excellent reception and remain

Very truly yours,
