

CANADIAN DX RELAY

ADDRESS
ALL COMMUNICATIONS TO:-

GODERICH, ONTARIO

~~January~~ February 3

PRESIDENT
and EDITOR

Mr. Kermit Geary,
R.F.D.#2,
Walnutport, Penna.

Fred H. Bisset

Hello down there,

COURTESY
PROGRAMS
COMMITTEE

Was very much surprised to hear from you and another Penna. reporter (a member) because the signal usually skips everything within 500 miles!

Elwin H. Bullard
Chairman

Anyway, this will verify your reception of the experimental transmitter you heard operating on 5990kes, Sunday, January 26th, 1936 at 12.35 am E.S.T. The power in the aerial was 15 watts or less. Yes, it was badly over-modulated according to all reports -- believe it or not at times the signal is heard with FB quality! Hi

Albert Sandham
Vice-chairman

PUBLICITY
MANAGER

Bernard L. Ahman Jr

By the way kindly do not give the transmitter any publicity please. Tks. If I remember correctly you reported hearing a transmitter on 6mc relaying WJR last Fall -- well that was this xmtr also! At the present time we are also relaying WJR from 6.30pm -on and certainly would appreciate you listening in down there in Penna. and let us know just when the signal is heard with maximum carrier strength. The reason for the unlicensed operation in the first place is a test to determine if it would be of any value to the club to attempt to obtain a license for a real FB transmitter of about 50 watts to be used entirely for the use of all DXers!
