

3-11-37

Dear Kermit:

I receive the NRC Bulletin each week, being DX Editor of the Cal. Broadcaster and I have been extremely interested in the publicity you have been giving W6XKG "The Pioneer S.W. Station of the West". It so happens that I am the person who conducts the Mon-Wed-Fri DX Tip periods over the station at 2 to 2:30 PM EST. and of course I am giving the National Radio Club publicity on practically every broadcast. The tips from the bulletin are also given out too. Your reports on W6XKG's signals in Pennsylvania agree 100% with letters we are getting from ALL sections of the country as well as Canada, Porto Rico, Hawaii, Mexico, Alaska and way points. "Yours truly" and the staff of the station are naturally jubilant over these reports for the power of W6XKG is ONLY 100 WATTS!

Card #2 will follow.
