

November 22, 1995

Mr. Kermit Geary  
1266 Riverview Drive  
Walnutport, PA 18088

Mr. Geary:

Sorry, for the lengthy delay in responding to your letter, regarding the reception of our signal. This year has been a nightmare for the low band stations with so much ducting and sporadic E.

Being a low band V, our power is limited to 100KW EIRP and the height to the tip of the antenna is 1602 feet. We use an RCA 6 bay Superturnstile antenna.

Sincerely,

Robert J. Ablah, Director of Engineering  
KFOR-TV
