Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

Thanks for your fine report on reception of Channel 49 dated June 26, 1982. Your observations do agree with our program log for that period of time, and as our facility includes custom-made equipment, we are always glad to hear of good reception from DXer's.

The visual output power of our transmitter is 30,000 Watts and the antenna system results in a radiated effective power of just over 500,000 Watts. The antenna height is approximately 500 feet above average terrain.

Very truly yours,

WGCB-TV 49
