Wayne,

Thank you for your interest in CKRX 1090 ROCKS. I am sorry that your first report went unanswered. I have been here for one year, and unfortunately the first report, for whatever reason, never made it to my desk.

The program that you describe in your letter is known as "Overnight", a nation-wide satellite service provided by the Rock Radio Network, to which we subscribe. We are on satellite from 00:00 until 06:00 daily.

1090 CKRX utilizes a 10 000 watt Continental transmitter with a three tower directional array. Day is omni, night is directional to the north. I have received letters from as far away as Europe and south-eastern Australia.

Once again, on behalf of all of us here at CKRX 1090 ROCKS, thank you for your interest in our station. We enjoy hearing from listeners, from both near and far.

Regards,

A handwritten signature in blue ink, appearing to read 'Tyler Everitt', written over a horizontal line.
