Mr. Wayne HEINEN
1028 Pike Drive
Colorado Springs, Colo 80904

Dear Mr. Heinen:

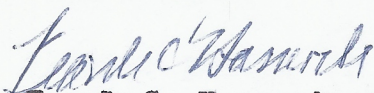

This is to confirm reception of our KCUZ signal on the date you specified in your letter of Feb. 3rd. Thank you for your report.

Yes, we are authorized for 1 kw daytime, and 250 watts nighttime. I was running 1 kw during our frequency check, in order to punch a signal through KAIR, Tucson, on our same frequency, which is monitored and checked in the city of Tucson. We are authorized to do this during the experimental period.

I do not have a copy of our daily schedule at this time to send, but we program mainly country and western music, during our daytime hours, and some mild rock music after dark. We also program 2 hours daily of Spanish programming, mostly music.

Again, thank you for your report, and if you are ever in our area, stop in and get acquainted.

Best regards,

Frank C. Hancock, c/e
