Wayne,

Yes you were hearing KNST Tucson on the afternoon of December 29th 2002.
At 4:31pm A PK 5 commercial ran followed by a Cholesterol Public Service announcement,
Time and Temperature announcement and back to Bob Brinker and Money Talk.

Yes you are correct that 790 used to have the KCEE call letters.

Oddly enough I received another letter from a DX'er in Tome, NM dated January 5th, 2003 so
there must have been some great conditions for a period of time.

KNST is 5000 watts day and 500 watts night non-directional.

Visit our website if you so desire at KNST.com.

It's good to know that even in Colorado KNST can be heard on occasion!

Sincerely,

Alan Cook
KNST/KWFM Program Director
