January 10, 1989

Mr. Wayne Heinen  
4131 S. Andes Way  
Aurora, Co. 80013

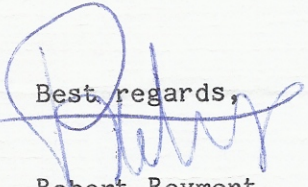

Dear Mr. Heinen;

Thank you for your reception report dated January 2, 1989, from 01:29 to 01:34 AM Mountain Standard Time. Your program details match our program log. KZZP(AM) is simulcast programming of our sister FM station KZZP-FM. Since we don't get many distant listener reports on KZZP(AM), it is not normally our policy to send out QSL cards for reception of our AM or FM stations.

KZZP-FM operates from South Mountain with an effective radiated power of 100,000 watts, as do most of the Phoenix stations. KZZP(AM) is located in Mesa, with a non-directional power of 5,000 watts day. The night power is 500 watts, with a directional pattern that puts most of the signal over the Mesa area. The night signal is almost a square over the city of Mesa.

Enclosed are a couple of promotional items you may find interesting. Again, thanks for your report.

Best regards,

  
Robert Reymont
