

AM STEREO

C-FAX 1070

890227

Mr Wayne Heinen
4131 S. Andes Way
Aurora, CO., USA
80013-3831

Dear Mr Heinen:

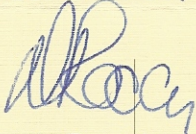

Thanks for your reception report dated 20 February, 1989. I'm able to confirm that you were receiving C-FAX.

C-FAX broadcasts at 10 kW using the same directional pattern and power 24 hours. This pattern is developed with an in-line four-tower array. The signal is modulated using Motorola's C-QUAM technique to develop an AM Stereo signal.

Yours is the second report we've received from the interior since CKST changed frequency, and interestingly enough both of you mentioned the change. Obviously you're keeping well abreast of changes in the broadcast spectrum!

Thanks again for your report.

Yours truly,

Dan Roach
Director of Engineering
C-FAX RADIO 1070 LTD
