

CKDA 1200

AM Radio

May 30, 1988

Dear Wayne:

Congratulations! It is with pleasure that we confirm your reception of CKDA 1200.

We have a vast coverage area and have received many reception letters, like yours, from literally all over the world. This, of course, is dependent largely on the atmospheric conditions.

For your interest and information, our frequency was changed from 1220 to 1200 on July 1, 1986. CKDA now broadcasts on 1200 Khz with a continuous power of 50 000 watts. We have a three tower array that broadcasts 24 hours a day. The array is located at Longitude $123^{\circ} 14' 53''$ West and Latitude $48^{\circ} 26' 02''$ North, and oriented to 315° .

We have enclosed some station logos, prize patches and paraphenalia for you. Thank you for your letter and we hope you will be able to tune us in again.

Yours truly,

1200 CKDA
