THIS CARD WILL CONFIRM YOUR RECEPTION OF RADIO STATION

KGIL

ON

1260 KILOCYCLES

SAN FERNANDO, CALIFORNIA

Thank you very much for your report.

DATE 19 December 1983 UTC 0824 to 0832 UTC

KGIL 1260 *On Everybody's Dial*

5 kilowatts directional day and night.

At the time of your reception report I was doing routine maintenance on the 5 kW Harris MW-5A transmitter, and the station was running the Collins 20V3 auxilliary transmitter with an output power of only 1 kW into the night antenna. The night antenna is a three tower in line array with the major lobe oriented toward the south pacific. You heard our signal off a minor lobe on the back side.

73 and DX
