Wayne Heinen
1028 Pike Drive
Colorado Springs, Colo. 80904

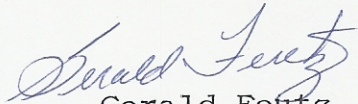

Dear Wayne:

I am happy to varify your reception of KGMS radio on 2-22-76.

KGMS operates on 1380 KHz @1000 watts DA-2. We are a remote controlled station, with our studios located in the North area of Sacramento and our transmitter located along the Sacramento River, some 5 air miles away. We use three in line towers 90° high and spaced 90° apart on a direction of 103° True. We have two transmitters, the main is a SPARTA 701B, new last year. Our alternate main is a Collins 20V, some 23 years old, but still in very good condition. KGMS also owns station KSFM, a 50KW ERP STEREO FM'er in Woodland, Ca. located some 18 miles from Sacramento.

Thank you for your report.

Sincerely,

Gerald Feutz
Chief Engineer
KGMS/KSFM
