

KIIS

FM 102.7
AM 1150

10/04/89 Wed 15:36

Mr. Wayne Heinen,
4131 S. Andes Way
Aurora, CO 80013-3831

Dear Mr. Heinen,

Thank you for your report about hearing KIIS-AM. I appreciate reception reports such as yours; they reassure our confidence that the equipment is working properly.

I have checked the operating log for Sept. 30, 1989 and found your report to match what we were broadcasting at the time.

We broadcast using a power of 5,000 watts non-directional during the day, and with 5,000 watts with three towers in a directional array at night. Our transmitter is located on the other side of the Pasadena Freeway from Dodger Stadium.

KIIS signed on in 1926, originally using the call letters KRKD. This was because the original studio location was in the Spring Arcade building in downtown Los Angeles. (The local C.B.S. affiliate, KNX, went on the air from the Annex to the Spring Arcade Building.)

Again, Thanks for your interest in KIIS.

Regards,

Michael D. Callaghan, WA6KPD
Chief Engineer
