Aurora, CO 80013-3831

Dear Mr. Glen:

I am very excited to have received your correspondence!! I am also pleased to hear that you received the CW I.D. test on 12/15/07.

I reviewed our station log to your program notations and they match up very closely. It was interesting getting this approved for air. Since this test was very short in duration of time, it doesn't easily fit into our program log. So I tried to run the test twice in the 1am hour so it would add up closely to one-minute duration of time. Most commercials are either :30 or one minute long, so I had to work with our traffic manager to get this approved

I have enclosed a home-made QSL card, since as a rule our radio station doesn't do this sort of thing.

Sincerely,

Brian Clark
