Dear Wayne,

Thks for your report of 01 Oct 86. That was us you heard between 0448 & 0450 AM PDT. A few min later we shifted up to full power, 10kW. You were very fortunate to pick us up with what is essentially a table radio. (The owner lives 40 or 30 or so miles from you & he likes the reception too!)

The ant is a  $\frac{1}{4}$  wave base fed tower over a 60 wire ground plane.
