Dear Wayne:

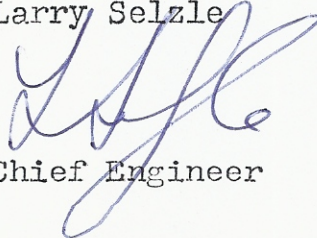

Thankyou very much for the reception report you recently sent to us at KATR Radio. The information presented was complete and accurate and matches the station logs for the day you reported.

KATR Radio used to be known as KGRE before the call letter change in July of 1986. The station signed on the air origanly in 1948 with the call letters KYOU. These call letters where used until early 1984 when the KGRE call sign was picked up. KYOU is now the call sign of our sister FM station at 92.5 Mhz.

KATR broadcasts 24 hours per day from transmission facilities just to the northwest of the city of Greeley. The transmitter is a Gates Radio BC-1T. We broadcast with 1,000 watts into a 5/8 wave, 340' non-directional antenna.

Again, thankyou very much the fine reception report. Good DXing!

Larry Selzle
