---

We used to boom into Pueblo....as primary coverat...  
Then came tranisitor radios with cheap tuners  
plus the big 5 000 watt station.. We could be hear in  
parts of the Springs...and even had regular listeners  
in the mtns west of denver....

We even verified on station in Christchurch New  
Zealand.. 19 years ago... It makes little difference  
since we program mostly to our own county....

Glad you managed tp pick us out of the  
n ise in ~~THE~~ THE SPS
