Mr. Heinen;

Congratulations, on your receiving us in Colorado Springs!  
We get DX reports periodically from various locations, mostly  
the Denver area though. This is the first report from the  
Springs that I've found. I've compared your notes with  
our Program Log and found them to be correct for the 5:45 to  
6:00.p.m time period. We are a 1000 watt daytime station with  
a 20 year old Gates BC-1F transmitter, which runs amazingly well  
for it's age.

Once again congratulations, and happy DX'ing.

Sincerely;

Bob Lyon: Chief Engineer
