

July 8, 2003

Mr. Wayne Heinen – N0POH  
4131 S. Andes Way  
Aurora, CO 80013-3831

Dear Wayne:

I am writing to confirm your reception of KJOL-AM on July 3, 2003 at 620 kHz between 8:24 pm and 8:28 pm. MDT.

The programming items and announcements you listed for that time period are correct.

KJOL operates at 5000 watts daytime power, and you were able to catch us in that twilight time when “everything was working for us.” Our power steps down throughout the evening to only 79 watts night-time, which obviously only covers the Grand Junction and Grand Valley area. KJOL is non-directional, 24 hours.

Enclosed are a few “mementos” from KJOL to add to your collection. Best of luck with your hobby...it sounds like fun!

Sincerely,

Ken Andrews, Manager  
KJOL-AM620
