Hi Wayne,

Please accept this letter as confirmation on your reception of KKZN on May 13, 2002.

As you mentioned, this particular dial position has seen a number of different call letters over the years. The transmitter power of 50,000 watts daytime, 1000 watts night has remained the same. Only the call letters and programming have been altered.

Good luck on collecting listening reports.

Sincerely,

Jan Chadwell, P.E.

Chief Engineer
Clear Channel Denver
