

September 15, 1992

Mr. Wayne Heinen
Box 605
Huntsville, Al 35804

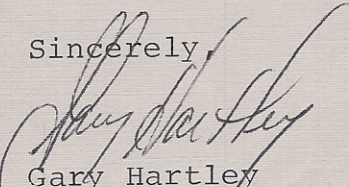

Dear Mr. Heinen:

Thanks for your reception report of September 8th. I'm sending this letter to confirm that report. Also, some "unbreakable" K-Rocky sun glasses. I hope they arrive in recognizable condition. If not, then maybe a little super glue or something.

KRKI is a 1 KW daytimer with an authorized pre-sunrise power of 500 watts. We also operate post-sunset at 47 watts. I'm afraid this will preclude any test broadcast for reception by members of the International Radio Club of America. We go dark each evening at midnight, and do not sign on again until 6 AM the next morning. In the month of September, be go to 47 watts at 7:15 PM MDT. If you can pick us out of the slush then, you'll deserve a medal. I'm refering to your seperate letter of September 1st, by the way in case I'm confusing you.

Must get back to the salt mine now. Happy DXing!

Sincerely,

Gary Hartley
Assistant Designated Chief Operator
KRKI RADIO
