

October 24, 1985

Wayne Heinem
4131 S. Andes Way
Aurora, CO 80013-3831

Dear Wayne,

This is to confirm your reception of our station on 610khz between 5:35pm and 5:48pm MDT on October 15, 1985.

On October 1st we changed frequency from 1360khz to 610khz in order to provide a stronger signal in our local coverage area. We are using a Harris MW5 5000watt transmitter and a 300 foot Guyed tower.

Thank you for your interest.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Martin C. Hijmans', written over a horizontal line.

Martin C. Hijmans
